3/12/98

Dear Mrs. Roberts,

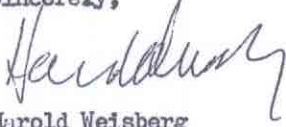

This asks nothing of you. I send it because it relates to your father's work on the Warren Commission. A friend using my files, to which for the most part I no longer have access, stairs being dangerous for me, saw it and called it to my attention because he knew that the FBI has prepared, its word, "dossiers" on the Members, twice on the staff.

Your father did not agree with the basis of the Report, the so-called single-bullet theory but he did sign the Report. Senator Russell told me this and it is in records I have from his archive, including an oral history for it by Senator Cooper, also a Member. Cooper and Russell were misled into signing the Report with which, to their dying day, both strongly disagreed.

The file number indicated is the FBI's headquarters file titled "liaison with the Warren Commission." The ticklet page has no file number because at least this copy was in a desk or file cabinet, not central files. *obtained via FOIA.*

It is an FBI record, however, and a copy may have gone to central files. I do not know whether one did or not, Practise was not consistent.

Sincerely,

  
Harold Weisberg
